TOWN PRESENTS CHANGES TO SEABROOK ISLAND BEACHES

FROM TOWN HALL

RON CIANCI

This summer, you will see a significant change on Seabrook Island’s beaches. We will no longer have off duty county sheriff’s officers patrolling our beaches. Starting on Memorial Day, the Town of Seabrook Island has contracted for the services of Island Beach Services, LLC (IBS) to both render assistance to those in need on our beaches and to enforce the Town’s beach ordinances, specifically as the ordinance relates to where and when dogs are allowed on our beaches. While Council appreciates the work that the off duty officers have performed for the Town, there were a number of limitations that it found to be unworkable. Firstly, and most importantly, the off duty officers were not trained in nor capable of water rescue. We have been fortunate in that we have not had significant incidents on our beaches, but we cannot ignore that possibility, particularly during peak tourist season. Last summer for example, on more than one occasion, the IBS employees working on our beaches were called to respond to emergencies at our beach. Secondly, the Town’s off duty county sheriff’s officers always being there when we needed them. When emergency situations arose, they were routinely pulled from service on our beaches to attend to County business. Lastly, as a matter of Charleston County policy, the off duty officers could not issue citations for violation of our beach ordinance. While most of our residents and visitors are knowledgeable of and willing to comply with our rules on the beach, unfortunately there are always a few who choose to ignore them. As a consequence of these limitations, last February the Town published a request for invitation for bid for beach patrol services. The bid of IBS was accepted.

For this first year IBS will have two persons patrolling Seabrook Island beaches during the period of Memorial Day (May 26) through Labor Day (September 4). During that period, IBS will patrol the beaches on alternating eight (8) hour shifts between the hours of 10:00 AM and 6:00 PM. We will commence the term of the contract after the first year.

You will be able to recognize IBS’s employees as they will wear uniforms and drive vehicles displaying the Town logo. The services which IBS will provide include: rendering assistance to those in need; enforcing the Town’s beach ordinance; responding to inquiries for information about beach goers; and providing weekly activity logs to the Town in an agreed upon format.

All of IBS’s employees are required to possess the physical ability to adequately and professionally perform the services required under its contract with the Town. Each of IBS’s employees will be adequately trained in water rescue. Each of IBS’s employees are required by contract to possess and maintain: (i) United States Life Saving Association open water lifeguard certification; (ii) CPR / AED certification, (iii) first aid training consistent with United States Life Saving Association Guidelines, and (iv) code enforcement training provided by the Town.

IBS will use its own equipment to perform the Services required under the contract including: a four-wheel drive truck or Jeep equipped with light bars and beach patrol decals, a rescue watercraft – including all necessary accessory boating and safety equipment (i.e., trailers, PFD’s, drybags, and helmets); and a rescue sled and board. The IBS employees will be required to become familiar with the town’s beach ordinances. One or more of IBS’s employees will be designated by Town Council as Code Enforcement Officers. Such employees shall be responsible for informing beachgoers not observing the Town’s ordinance of their responsibility to do so, and for the issuance of citations in appropriate circumstances. It is important to remember that IBS’s principal functions will be those related to public safety and providing information to beachgoers.

I would hope that the need to issue citations will be minimal.

BILLFISH TOURNAMENT AT BOHICKET MARINA

The South Carolina Governor’s Cup Billfishing Series came to Bohicket Marina on Thursday, May 11 with 29 boats that proceeded to catch 20 blue marlin, including three that were brought to the dock to be weighed.

“Thats certainly the best single day for blue marlin,” said Governor’s Cup tournament director Amy Dukes. Boats are allowed to fish two days in Governor’s Cup events, and while no single-day records were immediately available, Bohicket’s 20 blue marlin catch has been exceeded only five times dating back to 2006 in the series. Leading the trio of fish that were weighed was a 500-pound catch by Game On (photo right of ML Pleasant. Owned by Bobbi Roof and captained by Troy McMillan, Roof was also the angler on the blue marlin. The fish measured 109.5 inches, easily exceeding the Governor’s Cup minimum size limit of 105 inches.

The second heaviest blue marlin was a 408-pound catch by Home Run, owned by Steve Mungo and captained by Grant Bentley. Charles Roof was the angler on the fish that was only a half-inch shorter than Game On’s blue marlin. Home Run fishes out of Ripley Light Marina.

The third blue marlin was caught by Whitney Arnold aboard Bobbi Simmons Rare Breed out of Sullivan’s Island. Arnold’s catch weighed 412.9 pounds.

Scoring in the Governor’s Cup is 600 points for releasing blue marlin, 300 for white marlin releases and 200 for sailfish releases. Blue marlin are the only fish that can be weighed and they score one point per pound.

When most people think about winemaking, they think of California, Washington, Oregon or New York. However, there are other, lesser-known wine regions in the United States. For instance, those in the Midwest, such as the Finger Lakes in New York, may not be as well-known as their more famous counterparts, but they are certainly no less capable of producing world-class wines. In this article, we’ll explore the Finger Lakes wine region and discuss some of the key factors that contribute to its success.

One of the reasons the Finger Lakes is an appealing area for winemaking is its climate. The region’s cold winters and mild summers allow grapevines to grow, while the cool nights help preserve acidity in the grapes. This results in wines that are typically high in acidity and have a refreshing, crisp character. Additionally, the Finger Lakes is known for its high-quality Pinot Noir and Riesling, which are widely enjoyed around the world.

Another factor that contributes to the success of the Finger Lakes wine region is its commitment to sustainability. Many wineries in the area strive to use environmentally friendly practices, such as reducing water usage and minimizing waste. This not only helps protect the environment but also results in wines that are more consistent from year to year.

In conclusion, the Finger Lakes wine region is a hidden gem for wine enthusiasts. With its unique climate, high-quality grapes, and strong commitment to sustainability, it’s no wonder that more and more wineries are choosing to locate in this region. As a result, the Finger Lakes is quickly gaining recognition as a world-class wine region.

EXCHANGE CLUB NEWS

TURTLE PATROL SEASON BEGINS WITH A FLURRY

The first South Carolina Turtle Nest of the 2017 Turtle Season was reported by the Turtle Patrol on Sunday, April 30th. As a result, the Turtle Patrol issued a Turtle Patrol Nesting Advisory on Monday, May 1st. The advisory was in effect until Thursday, May 4th.

Throughout the season, the Turtle Patrol has worked to protect the turtle nests and ensure the safety of the turtles. The Turtle Patrol is made up of volunteers who monitor the turtle nests and provide assistance when needed. The Patrol is funded by donations and the proceeds from the sale of turtle tags.

The Nesting Advisory was issued to inform the public of the presence of turtle nests and to encourage people to keep a safe distance from the nests. The advisory also reminded people to report any suspicious activity to the Turtle Patrol.

The Turtle Patrol is an important resource in the protection of the sea turtles and their habitats. Through their efforts, they help to ensure that the turtles have a safe place to lay their eggs and raise their young.

ABOUT THE STUDENTS:

The students at St. John's High School have been working hard to create an information notebook to share with the community. The notebook includes information on turtle nesting, turtle conservation, and the importance of protecting the turtle nests.

One of the students involved in the project is Mary Won. Mary is a senior at St. John's High School and serves as the President of the St. John's High School Environmental Club. Mary has been working on the project for the past few weeks and is excited about the opportunity to share her knowledge with the community.

Mary has been involved in various environmental projects throughout her high school career. She has volunteered with the Charleston and Kiawah Island Turtle Patrols and has participated in several beach clean-up events. Mary has also been involved in the local community and has served as a member of the Kiawah Island Youth Council.

Mary Won is passionate about protecting the turtle nests and hopes that the notebook will raise awareness about the importance of turtle conservation. She encourages everyone to support the turtle nests and to make a difference in the lives of these amazing creatures.
Seabrook Island Dogs and Humans Have Fun at SEADOGS Beach Walk While Raising $6785 for Hallie Hill Animal Sanctuary

SEADOGS, the Seabrook Island dog and beach advocacy group, held the annual Beach Walk on April 27, 2017 on North Beach. The Beach Walk is a tradition that has helped the Seabrook Island community combine fun for dogs and their humans with charitable giving to worthy Charleston animal causes.

The Beach Walk attracted about 40 dogs. All had a tremendous amount of fun enjoying beautiful weather and the great beach. SEADOGS was also honored to host Jennifer Middleton, Hallie Hill Animal Sanctuary Director. As had been mentioned in advance, the event also had the purpose of raising money for this wonderful charity. In fact, an amazing total of $3635 was donated by participants at the event. The SEADOGS President’s challenge contributed another $100 bringing the grand total raised for Hallie Hill to $4635. To put this great result in perspective, the 2016 event raised $3880. Congratulations to everyone who participated in the Beach Walk and the giving. Only on Seabrook Island could this happen!

SEADOGS will have one more event this fall. We’ll be announcing details later this summer. You can be a part of this important community organization. Membership is $25 per year. For more information about the SEADOGS, contact either Mitch Pulwer at mjpulwer@yahoo.com or Jerry Cummin at hutchiejerrycummin@gmail.com.
The Future of Seabrook Island’s Alligators Depend on YOU – DO NOT FEED THEM!!

Alligators, Alligator mississippiensis, have called Seabrook Island for thousands of years. These alligators have become a cherished part of the island’s wildlife and a symbol of the ecological balance that exists on the island. Feeding them, however, is not only dangerous to the alligators but also to the environment and the local community.

Feeding alligators can cause them to lose their natural fear of humans, making them more aggressive and potentially dangerous. It can also disrupt their natural feeding habits, affecting their health and the ecosystem. Feeding alligators can also attract other animals, such as raccoons and birds, which can be dangerous to both the alligators and other wildlife.

It is important to remember that alligators are wild animals and should be respected at all times. They are not pets and should not be fed or handled in any way. Feeding them can also create a dangerous situation for both the alligators and the people who are trying to feed them.

As residents of Seabrook Island, we have a responsibility to protect our wildlife and the environment. We should not feed the alligators, but rather enjoy their natural beauty and their presence on the island without disturbing them. By not feeding the alligators, we can help ensure their survival and the long-term health of the island’s ecosystem.

If you see an alligator that appears to be in distress or is injured, it is best to leave it alone and contact the local environmental or wildlife agency. They will be able to assess the situation and provide appropriate care for the alligator.

In conclusion, it is important to remember that alligators are wild animals and should be treated with respect and kindness. By not feeding them, we can help ensure their well-being and the long-term health of the island’s ecosystem. Let’s work together to protect our wildlife and the environment for future generations to enjoy.

We make Dads look special.

### OYSTER CATCHER COMMUNITY CENTER INFORMATION

The Oyster Catcher Community Center is open to all Property Owners and guests. The Center is located at 100 SIC seating area 1

**Weekly Schedule:**
- **Mondays:** Open for meetings, classes, and community events.
- **Tuesdays:** Closed.
- **Wednesdays:** Open for meetings and classes.
- **Thursdays:** Open for meetings and classes.
- **Fridays:** Open for meetings and classes.
- **Saturdays:** Open for community events such as arts and crafts fairs.
- **Sundays:** Closed.

**Facilities:**
- **Fitness Center:** Includes cardio equipment, weights, and a fitness room.
- **Amenity Center:** With a kitchen, lounge area, and restrooms.
- **Outdoor Pool:** Heated and open year-round.
- **Tennis Courts:** Available for use at no cost to Property Owners.
- **Basketball Court:** Available for use at no cost to Property Owners.
- **Playground:** Includes swings, slides, and a climbing structure.
- **Picnic Area:** With tables and grills.

**Amenity Card Information:**
- **Community ID:** Required for access to all amenities.
- **Amenity Card Holder:** Must be present on premises during use.
- **Amenity Card Costs:** $25 per year.

**Special Events:**
- **Memorial Day Picnic:** 10am-2pm
- **4th of July Fireworks:** 9pm
- **Labor Day Barbecue:** 5pm-8pm
- **Fall Festival:** 10am-2pm
- **Winterfest:** 10am-2pm

**Contact Information:**
- **Community ID:** Contact April Goyer at 843.725.1581 or email agoyer@sipoa.org.
- **Amenity Card:** Contact Jamie Mogus Mixson at 843.725.1581 or email jmogus@sipoa.org.

### LAKE HOUSE INFORMATION

**Nine Mile Point Road Loop:**
- **Parking:** Available on Nine Mile Point Road.
- **Bathrooms:** Available near the Outdoor Pool.
- **Shade:** Available near the Outdoor Pool.

**Fourth of July Art Show:**
- **Location:** Oyster Catcher Community Center.
- **Date:** June 28th.
- **Time:** 10am-4pm.

**Fifth of July Art Show:**
- **Location:** Oyster Catcher Community Center.
- **Date:** July 5th.
- **Time:** 10am-4pm.

**Fourth of July Parade**
- **Date:** Tuesday, July 4th.
- **Time:** 9:30am.
- **Location:** Seabrook Island Club Driving Range.
- **Rain Date:** Wednesday, July 5th.

### LAKE HOUSE SPOTLIGHT

**PUMPKIN TIME!**

**Win the Battle of Age Related Muscle Loss**

**Four Key Questions to Ask Yourself:**
1. **How much muscle do I need to maintain quality of life?**
2. **Can I build muscle mass at any age?**
3. **What exercise can help me at any age?**
4. **How can I ensure long term gains?**

**Key to keeping your muscle mass:**
- **Eat for your muscles:** It is the most vital role of exercise. Eating the right foods, like proteins, vegetables, and fruits, can help maintain muscle mass.
- **Lose muscle in a process that comes with aging, but you have the power to control it.** Regularly making the right food choices can help. It is important to maintain a healthy diet and include in your fitness program.
- **Engage in strength training and balance exercises:** The best way to reverse age-related muscle loss and build muscle mass is to engage in strength training and balance exercises.

**Fitness Class Information**

**Next Session Begins June 18th**
