For the second year in a row, Seabrookers were asking one another, “Do you have power?” While shifting much further to the west than was originally anticipated, Hurricane Irma still had enough power to cause significant “flood issues” on our island, which resulted in power outages beginning at 11:30 on Monday the 11th and continuing in some cases through Thursday the 14th. The experience caused difficulty and discomfort and was clearly frustrating for those residents whose power was out for a significant length of time.

Many residents expressed concern that Berkeley Electric did not get to Seabrook soon enough or allocate sufficient resources to our area. Others thought BEC’s crews were working on Kiawah, and not Seabrook. To get answers to these and other questions, on Tuesday, September 19th, I met with Dwayne Cartwright, president and chief executive officer of Berkeley Electric, Tim Mobley, Vice President of Engineering and Operations and other BEC staff members. I wanted to understand Berkeley’s response to the power outage and to explore what actions both we and it could take going forward to ameliorate the effect of significant storms which appear to be occurring on a more frequent basis. I left the meeting confident that Berkeley’s team had been responsive to our needs. Its employees and contractors worked long hours, under unpleasant and difficult conditions caused by flood water and surging tides.

The outages were the result of a number of BEC equipment failures caused by significant flooding throughout the island reaching live parts in the equipment. The principal equipment failure was to three sets of switchgear on the Kiawah side of the circle (PMH-3 switchgear). The switchgear, which delivers power to the three circuits that serve Seabrook Island, were inundated when Haulover Creek came over its banks in the worst flooding of that creek BEC says it had experienced in the last fifty years. Marsh Gate flooded, taking out a transformer and causing a second piece of equipment (elbow junction) to fail. A fourth switchgear failed and needed to be replaced at the Pelican Watch Villas, and, closer to the Seabrook Island Club, both a transformer and junction box required repair. Other equipment throughout the island suffered damage.

Unlike Matthew, BEC did not turn off power in advance of Irma’s impact. On Saturday the 9th, the Town reached out to BEC and requested a one hour notice of BEC’s intent to shut off power. BEC requested a list of streets most prone to flooding. Because Seabrook Island was not under an evacuation order, Berkeley anticipated that a number of Seabrook residents would not evacuate. Accordingly, it decided to leave the circuits energized with the hope of maintaining power to as many Seabrook Island residents as possible.

When assessing BEC’s performance, it is important to keep in mind that Irma affected BEC’s entire co-op system, approximately 94,500 customers, and that Seabrook Island’s 2,799 services make up about three percent (3%) of the total number of services in the co-op. Almost 31,600 Berkeley customers (including 14,580 in its Johns Island District) were without power following the storm. BEC does have in place a Major Storm Plan which sets forth the processes and procedures which it will follow in conditions such as those caused by significant storms.

Dublin

My trip to Dublin is to partly examine investment for a possible move. First, the validity of the Irish people paying such a high amount of income tax, and second, how much my food while being treated to mother's cooking, simple, every day, yet full of love, is a true Irish experience. 

We were welcomed by the Irish people with arms wide open through the streets of Dublin, a true hospitality, as the Irish people seem to have never seen anyone before.

We were welcomed by the Irish people with arms wide open through the streets of Dublin, a true hospitality, as the Irish people seem to have never seen anyone before.

My other memorable restaurant experience was at a place called Cooper's Bar. Relaxing by the pool, with a good book and a glass of wine, is a true Irish experience.

The story thread through this trip gives me goosebumps and was reminiscent of something I had experienced before. 

Making Better Use of Your Technology

Simplifying Your Technology (Part 1)

I imagine that most of you have a computer. Desktop display, monitor, keyboard, mouse, and so on. It’s hard to imagine a work environment without computers, whether we’re at our desk or in the field. 

For those of you who are interested in technology, whether at work or in your private life, you’re probably aware of the benefits of using technology to improve your efficiency and productivity.

Art created by participants with Alzheimer's disease and other types of dementia will be on display for sale at the Kiawah Island Art Exchange Club on October 28th, beginning at 5 pm. The exhibit features art created by participating artists with Alzheimer's and other forms of dementia. The show will run through November 11th, with artists acting as docents to discuss their work. Artists will be on hand to answer questions and to discuss their art. The event is free and open to the public.

Supporters attending the gala will enjoy champagne, cocktails, and a delectable array of hors d'oeuvres and dessert. Respite Care Charleston is a 501(c)(3) nonprofit organization. Respite Care Charleston is committed to offering programs and support for caregivers.

Nomination Deadline is October 20

The Kiawah-Seabrook Exchange Club announces its Angel Oak Award, which he/she can designate for as- signments from the public. The deadline for nominations is October 20, 2017.

The award goes to a person who performs volunteer services which contribute significantly to the people and/or quality of life of Wadmalaw, Johns, Kiawah, and/or Seabrook Island. The award is called the Angel Oak Award and is given to the island which clearly represents the Island which best embodies the spirit of volunteerism. The recipient need not live on the island.

Get ready to throw your creativity into hyper drive! Working with photographic textures is hot! Kate will walk you through creating textures in Lightroom and Photoshop, choosing the right textures to use, how to make them mesh, and finally, how to process the images. She will be demonstrating these techniques in Photoshop CS3, Tonal Textures, Enhance, and the new program for Mac called Luminar. You can even use textures in Lightroom! It’s nice to be a pro and informative pro to boot! Until you know what you’re doing, it’s best to have this knowledge before you look at the bottom of the frame ever again. www.katesilviaphotography.com

The tournament began as a local competition for senior players from around the Charleston area. It has been named the Senior Open Clay Court State Championships since 1984. It is free of charge. Whether you play tennis or not, you will be excited by the caliber of tennis exhibited at our courts. It is a must for match to match, enjoy the free ice cream line and visit with us at the tent set up in the heat court of the courts.

The Fleming Returns October 4 - 8

The 36th Annual Fleming Junior Open Clay Court Championships will be held October 4 – 8. The tournament began as a local Seabrook Island competition in the early 1980’s. Since then, it has grown into the premier men’s event in the Southeast, both quality and competition.

The overall winner is chosen as the best tournament of the year by voting players. In past, it reflects the hospitality with which the island welcomes the players.

The tournament is open to all. Entries are coming in and come in a variety of forms. There are a variety of forms available for sponsorship and donations for the award. The award is a 3000 Czech crown.

McCann’s Irish Pub Opens on Seabrook

This past week, McCann’s Irish Pub opened for business. It is located right outside the front security gate on the site of the old Lucy’s Red Sky Grill.

As Irmas loomed on Thursday Sep- tember 7th, a room of Seabrook Island Turtle Patrol members were on hand to watch and record the movement of sea turtles. The Turtle Patrol has hatched. Especially given that all but one of the nests had hatched, the group felt pretty good about the fact that all but one of the nests hatched. Especially given that many other beaches, including Kiawah Island, still had a third of their nests left to hatch.

Green Day = Success!
Radiant sunshine! Passionate participants! Industrious volunteers! Mouthwatering food and melodious tunes! Lucky prize winners! All made it an extraordinary day for the love of our cherished Island!
One of the highlights of Mayor Ciancio’s term in office is the successful completion of the Seabrook Island Day Care Center. The Children’s Day Care Project was approved by the Town Council in 2016 and a groundbreaking ceremony was held in 2017. The construction of the center was completed in 2018 and it was operational by January 2019. The Day Care Center provides high-quality childcare services for the children of Seabrook Island. The project was funded through a combination of Town funds and grants from various state and federal agencies. The Day Care Center is located in the heart of the town and is easily accessible to all families in the community. It has been a great asset to the town and has helped many families by providing high-quality childcare services.
Local News Apps:

The power went out. Now what? Here are a few things that can come in handy to share some pointers that hopefully will be just a review of things that you are already aware of and are putting into practice should the need arise once again.

Well, there goes the power again. Even if you don’t plan on constructing your own storm shelter or building a wooden fort for the kids to hide out in, there are still a few things that can come in handy to stay safe and assist others if your neighborhood is affected.

Use your phone as a Personal Hotspot:

Many of us have smartphones that use cellular service to provide connectivity to those devices. When the power goes out, our home internet may be down, but we still have our cell phones and can use the power on our phone to connect with others via WiFi. Download a local news app for our area that could be especially useful in a worst-case scenario. Storms and hurricanes make us think about life after a major disaster. One of the first tasks would have to be to file claims with your insurance company. During photos of your home heating and furnace system. It is always a good idea to have on your phone if you have a waterfront property. I’ve also heard of people using their phones to record when a storm is approaching their home. It’s the first line of defense.

Taking Pictures of Important Belongings:

In a worst-case scenario, you’ll want to think about life after a major storm. This is the first line of defense to file claims with your insurance company. During photos of your home heating and furnace system. It is always a good idea to have on your phone if you have a waterfront property. I’ve also heard of people using their phones to record when a storm is approaching their home. It’s the first line of defense.

Online News Apps:

Portable Power:

Download the NOAA App for the latest information regarding hurricanes and other natural disasters.

HeartBeat: Texas: Listen to local radio stations in the Charleston area that could be especially useful in the midst of a storm.

Twitter: Even if you don’t plan on constructing your own storm shelter or building a wooden fort for the kids to hide out in, there are still a few things that can come in handy to stay safe and assist others if your neighborhood is affected.

Thanksgiving Fitness Events

Thanksgiving is right around the corner, and the Lake House is gearing up for its Annual Thanksgiving Turkey Trot and Sprint Triathlon Relay.

Keep up with Chad’s columns and as much more on Tidelines, the Community Blog of Seabrook Island.

TIDELINES SPOTLIGHT OCTOBER 2017

THE SIP OA PAGES OCTOBER 2017

Lake House SpotLight

Thanksgiving Fitness Events

Thanksgiving is right around the corner, and the Lake House is gearing up for its Annual Thanksgiving Turkey Trot and Sprint Triathlon Relay.

Leaving the cooking for later, and for someone else and join us at The Lake House on Thanksgiving morning for SeaBrook Island’s Annual Turkey Trot! This event or 10K will start safely at 9:00pm from the Lake House and will take you through the front half of the Island. (Front half are limited) availability and size are not guaranteed after Monday, November 6th.

Thursday, November 23rd

Time: 8:00 AM

Cost: $20.00

Registration forms are available at the front desk of The Lake House.

Remember, there is no better way for Shred Day this year.

Shred Day Time again to clean out those old bills!!

Shred Day will be at the Town Hall again on Friday, October 6, 2017 from 9 am to 1 pm in the Town Hall Parking Lot. Paper may be brought to the site all day long, but they are not able to shred the actual box. This is the first Shred Day that enables Seabrookians to shred directly on their own reusable storage bags.

shred day is one way to protect yourself from identity fraud.

7th Annual Sprint Triathlon Relay

Before the lodging begins and the games start!... why not have some fun?

Join us at The Lake House on Saturday, November 25th for SeaBrook Island’s 7th Annual Sprint Triathlon Relay.

Saturday, November 25th

Cost: $50.00 per team

It’s a triathlon with a team twist! Instead of an individual timing three events, we would like to put a Stopwatch on you and start the fun among a team of three.

Teams are composed of 1 swimmer, 1 biker, and 1 runner that will work together to complete all 3 legs of the event.

Registration forms are available at the front desk of The Lake House. Please note: this event will only be sailed, so sign up early to ensure your team is a part of our 7th Annual Sprint Triathlon Relay!

For more information about the Turkey Trot or the Sprint Triathlon Relay, please contact Jamie Mogus Mixson at jmogus@sipoa.org.

Brown & White Pick-Up Day

The annual Brown & White Pick-up Day is October 6.

Bull carts can be hauled by 750-800 lbs. — enough to include refrigerators, microwaves, ovens, clothes dryers, and other household items. However, the waste must be hauled directly to the attendant on duty. The materials cannot be left on the ground.
The Charleston Museum is excited to announce the opening of its new, fully-interactive Natural History Nature’s Lookout opening on September 25. Designed with local natural history and geological examples from the Museum’s extensive collection, the gallery will provide a comprehensive overview of Southern natural history and as an excellent educational resource for the Charleston community. A key objective of the Museum’s 2105-2016 Strategic Plan was “to develop creative programming and exhibits that will increase community awareness and appreciation of the Museum’s exhibits. Our top goal is to engage the public.”

Accordingly nearly 840 sq. ft. of space, the largest in the Museum, the reconstructed gallery will feature all new exhibits and a selection of living and natural history related objects unrelated in the Charleston area, a number of which have never been shown before. Highlights include: complete pupal and adult stages of the world’s largest flying insect, and a 27” will gram pond complete with several of these creatures collected from the Lowcountry’s fresh water habitats and over 230 new casts of all creatures related objects unrelated to the Charlorton area, a number of which have never been shown before.
