Mr. W. Allen Reed receives a $5,000 donation for his summer reading and math program at Angel Oak Elementary on John's Island.

Kiawah-Seabrook Exchange Club Foundation President Ms. Judith Condon, Angel Oak Elementary Principal Bob Leggett, Kiawah-Seabrook Exchange Club Foundation President and Ms. Judith Condon, Angel Oak Elementary Principal Alan Armstrong, Angel Oak Award Committee Chair, W. Allen Reed, 2018 Angel Oak Recipient, Bob Leggett, Kiawah-Seabrook Exchange Club Foundation President and Ms. Judith Condon, Angel Oak Elementary Principal

The Kiawah-Seabrook Exchange Club Foundation celebrated its annual Angel Oak Award at a dinner-dance held at the Seabrook Island Club on February 13. The Angel Oak Award recognizes a volunteer who has made an outstanding contribution to the people or quality of life on Johns Island, Wadmalaw Island, Kiawah Island, and/or Seabrook Island. As part of the award, the Exchange Club Foundation makes a $5,000 donation to a local charitable organization or organizations of the recipient’s choice.

The 2018 recipient is Mr. W. Allen Reed who created and manages the Angel Oak Summer Reading Program at Angel Oak Elementary School on John’s Island. In his remarks, Mr. Reed described how a combination of struggling students, the chronic teacher shortage, increased classroom sizes, and low funding levels led to under-performance in reading and math for students at Angel Oak Elementary. This was compounded by the learning loss associated with the summer break.

The program is the result of Mr. Reed’s desire to give back to the community after the shootings at Mother Emanuel Church in Charleston in 2015. The initial concept for the program came from a collaboration of community and church members who looked at the needs of the people on Johns and Wadmalaw islands. Then the Angel Oak principal, Ms. Judith Condon and the school’s principal, recognized the needs of their students and Mr. Reed worked to make this vision a reality. The program has improved each year, increasing the enrollment and using improved reading, math, and social studies experiences. Working with Ms. Condon, Mr. Reed has developed a six-week program that has a real impact on the lives of students on John’s Island.

The program centers around four hours of reading and math each day, but it also includes other activities to broaden student knowledge and experiences. Additional programs include computer coding, art, dance, cooking, Spanish and sports programs as well as field trips to provide students with a broader perspective of their community. There is also a weekly community engagement segment where local volunteers introduce students to a broad range of topics, from talks about the U.S. Coast Guard to discussions of life choices.

To date over 300 students have participated in the program and the results have been impressive, with more than 80 percent of participating students improving their reading and math test scores. In 2018, 19 percent of participating students showed a greater than one-year improvement in their reading and math skills after completion of the program.

The Angel Oak Summer Reading program is an example of public and private sectors coming together to make a real impact on the community. Mr. Allen’s vision and passion are at the heart of the effort, and the primary reason for its success.

As Seabrooker volunteers with a common objective, we are committed to securing the facts and reporting them. Participants in the group include but are not limited to Mike Gorski, Jerry Reves, M.D., and Jerry Reves, M.D., who are all well-respected members of the community.

Welcome to the first RDP/RM Perspectives columns. I will be writing about the economy, markets, and investing in general in this space. 2019 will be interesting as we are in the middle of a business cycle. Most of the economic drivers are still on the upswing, but we will see some cooling off as we get closer to the recession. I will be writing about the drivers of the economy, the drivers of the market, and how to deal with a compliance department.

The opinions voiced in this newsletter are my opinions and should not be taken as investment advice. While my bona fides are what they are, you will have to decide for yourself if my analysis and opinions may assist your investment objectives.

Please send correspondence and inquiries regarding editorials to TheSeabrooker@yahoo.com or call 843.408.3707.
I have a special request that I would like to make. Our annual Christmas party is coming up next week, and we have invited some of our closest friends and family members to attend. However, due to the recent increase in COVID cases, I have decided to limit the number of attendees to only those who are vaccinated. Is this acceptable?
The nineteenth annual Kiawah Island Art and House Tour is scheduled for Friday, April 5th. Cookies and Cream Tours is honored to be hosting a beautiful Oceanside Home which can be found at 1403 Fish Tail Lane. This home can be found on the north side of the Atlantic Ocean with a breathtaking view of the marsh grasses and the 17th hole on the Ocean Course, this light filled home is built to be family friendly: the floors are light and hard, two La Cornue ranges, one gas and one electric, will allow you to cook whatever you wish. A perfect place to entertain family and friends. The feeling of welcome and embrace family and friends. The feeling of welcome and embrace family. The feeling of welcome and embrace family.
The night of a pitchblack door alongside the road is not by far the greatest "surviving event," as all Seabrook Island. It is starting to see the upright white and heavy brown framed in a dark back,

ground, especially in the dazzling evening light.

Seabrook are fortunate to have several Piebald deer that are more abundant. Native Americans, for example, believed that white fawns are important to native culture and often portrayed them in their art. However, the survival rate is different when talking about Piebald deer. They are a rare condition often live normal lives, and they can be expected to live around 5 years after being observed. Experts estimate that Piebald’s make up less than 1% of all the local population, so you can never be sure you see a Piebald deer. Generally, Piebalds can be identified by their unusual color; they also have a number of other physical abnormalities. Unfortunately, the survival rate is much lower for Piebalds than for normal whitetail deer. Albinos sim-

lie lack the genes for pigmentation and have no pigment in their hair, hooves, or their eyes, which present a greyish appearance. Piebalds on the other hand, can have a number of color abnormalities, including being albino or a calico (brown-eyed, white, and black-eyed) or even a mosaic of these three with varying degrees of all three.

The degree of Piebaldness varies considerably from one animal to the next. Sometimes a Piebald is barely noticeable, while others are very obvious. Piebalds are usually not normal in appearance, but they can still be healthy. They lack the normal white pigment of a Piebald, and they are often associated with several health problems. Piebalds are often known to have fewer of the major health problems. Piebalds born with milder symptoms of this rare condition often live normal lives, and they can be expected to live around 5 years after being observed. Experts estimate that Piebald’s make up less than 1% of all the local population, so you can never be sure you see a Piebald deer.

The Piebald color condition is more common than the rare albino color condition. It is caused by a genetic mutation that affects the development of the pigment cells in the skin and hair. Piebalds are often known to have fewer of the major health problems. Piebalds born with milder symptoms of this rare condition often live normal lives, and they can be expected to live around 5 years after being observed. Experts estimate that Piebald’s make up less than 1% of all the local population, so you can never be sure you see a Piebald deer.

Online Medical Advice

Got a medical question? Hard to find trustworthy, credible information? Here are selected sites that are credible scientific medical journal. Online advertising fees and are so often less easy to understand than the print of the sponsor and that have not been peer reviewed by experts in the field. With a billion places to find medical advice, is a reliable source of a medical question?

If you go to the site as I did Sunday morning and you want to know about a condition you have, or think you have, or are just curious, you can use your knowledge on past medical conditions and symptoms to help you determine the best course of action to pursue. You can then make an informed decision.

There are governmental sites as the American Heart Association, the American Cancer Society, or a variety of information based on symptoms that can be obtained at disease-categories.gov, or the National Library of Medicine and the National Institutes of Health. There are sources on how to focus on the medical condition and symptoms that are mentioned in the question. The information on those sites is free, open and authoritative, and peer reviewed by experts in the field.

Wiki, the world encyclopedia, is an open source in the medical condition and symptoms that are important in the medical problem you're experiencing. Wiki is also a site on the internet, where you can get treatment and advice, and other sources of information, and your chief question, and your chief concern. There are governmental sites as the American Heart Association, the American Cancer Society, or a variety of information based on symptoms that can be obtained at disease-categories.gov, or the National Library of Medicine and the National Institutes of Health.

COOPER CREEK BRIDGE RUN
SEABROOK ISLAND BUS
Saturday, April 6, 2019
The Lake House will once again be serving breakfast at 6:30 AM before the Run. Lunch & Dinner will be served in the new Studio area

Voting Results
Annual Budget: APPROVED
LAKE HOUSE
• Bus will leave from behind the Aquarium Parking Garage once all participants have boarded.
• Bus leaves promptly at 5:50 AM from the Seabrook Island Real Estate Parking Center.
• Bus will return from the Cooper Creek Bridge Run to Lake House 11:00 PM.

Fitness Class Information
LAKE HOUSE
KENTLE YOGA
8:15 AM • Mondays
KENTLE YOGA is a slow, gentle class featuring a transition through basic yoga poses. It is designed to increase flexibility, promote mental health and reduce stress. This class is perfect for individuals new to yoga or those wishing to slow down.

TOTAL BODY TONING
11:00 AM • Standard
This class is designed to work the full body, emphasizing each muscle group. Focus will be on endurance and strength.

LIVE OAK TALKS
Wednesday March 13, 2019 thru Thursday, April 18, 2019
Colcannon Serves 6
1 sm. head Savoy cabbage, shredded
- 1 storage onion, peeled
- 1 sm. green onion, sliced
- 1 garlic clove, minced
- 2 tbsp. butter
- 1 tbsp. olive oil

Melt butter and oil in a hot pan. Add garlic, onion and cabbage to the pan. Cover and cook over medium heat for 5 minutes.
Add flour to the pan and stir until the flour is well combined. Add milk to the pan and stir until the mixture is smooth.

Pour the cabbage mixture into a large bowl. Add the remaining ingredients and mix until well combined. Place the mixture into a greased baking dish and bake in the oven at 375 degrees for 45 minutes or until the mixture is golden brown.

Step Inside Some of America's Most Beautiful Houses & Gardens
Wednesday March 13, 2019 thru Thursday, April 18, 2019
The unique natural landscapes that can be found on the coast of the South Carolina Islands have been the inspiration for many of America's most beautiful houses and gardens. From the grand, historic homes in Charleston to the intimate gardens in Hilton Head, there is something for everyone to enjoy.

The new home collection at Seabrook Island by Salt Marsh New Townhomes.

The Lake House will serve breakfast at 6:30 AM before the run.

Please note: Registration for the Cooper Creek Bridge Run is the responsibility of the participant. For more information or to register, please contact either the Lake House or the Cooper Creek Bridge Run.

The Gilcrease Museum of Art, home to one of the foremost collection of American art, that showcases the works of artists such as Winslow Homer and Andrew Wyeth. It is located in Tulsa, Oklahoma, and is a cultural landmark in the city. The museum is renowned for its collections of American regional art, including works by Western artists like Albert Bierstadt and Thomas Moran. The museum is also known for its exhibitions, education programs, and public programs, which attract visitors from around the world. The museum's mission is to preserve and present American art and culture, and to engage visitors in the appreciation of the arts. Visitors can explore the museum's galleries, attend special events, and participate in hands-on workshops to learn about American art and culture. The museum also offers membership programs, which provide benefits such as free admission, discounts on special events, and access to members-only events. The museum is open to the public during regular hours and admission is free. Visitors can also visit the museum's gift shop, which offers a wide selection of art-related merchandise and books.
