Recent reviews of training and exercise sessions of the Town’s Disaster Recovery Council resulted in an action item to inform residents of techniques to improve ease of obtaining emergency information issued by the Town. In particular: (i) setting up a shortcut for the Town’s website on mobile device home screens; and (ii) enabling text notifications to mobile devices when new information is posted to the Town’s TWITTER feed. Residents are encouraged to set up these “navigation” aids on mobile devices that will be on hand during a disaster event and while evacuated.

Town Website Shortcut for Mobile Device Home Screen
A home screen “shortcut” allows the user to tap an icon on the device home screen to initiate navigation to a desired website or webpage. To add a shortcut for the Town’s website, follow the steps for the type of mobile device platform (Android or Apple (iOS)) that will be used.

Android Using the Android 4.2+ Browser
1) Select the device home screen icon that looks like a globe to start the Android browser;
2) Enter “townofseabrookisland.org” in the browser text bar and press “Enter” or “Go” to navigate to the Town’s website;
3) Select the star outline icon to the right of the address bar of the browser;
4) Enter the desired shortcut name at “Label”;
5) Select “Add To” to display the drop-down menu for destination of the shortcut;
6) Select “Home Screen” to cause display of the Town website shortcut on the home screen.

Using Chrome for Android
1) Select the Google Chrome icon on the device home screen or app drawer to start the Chrome browser;
2) Enter “townofseabrookisland.org” in the browser text bar and press “Enter” to navigate to the Town’s website;
3) Select the device home screen icon that looks like a globe to start the Chrome browser;
4) Enter “townofseabrookisland.org” in the browser text bar and press “Enter” to navigate to the Town’s website;
5) Select the icon that looks like a globe to start the Chrome browser;
6) Enter “townofseabrookisland.org” in the browser text bar and press “Enter” to navigate to the Town’s website;
7) Select “Home Screen” to cause display of the Town website shortcut on the home screen.

The Town of Seabrook Island is pleased to announce that it will again sponsor a musical performance by the Charleston Symphony Orchestra on Sun. September 22nd at 4:00 pm. The performance will take place on the Lake House lawn, located at 2319 Seabrook Island Road.

The 47-piece Orchestra will be under the direction of Ken Lam, who will conduct the Masterworks portion of the program, and Yuriy Bekker, who will conduct the POPS. The program will feature a wide range of outstanding music, including pieces written by Beethoven, Dvorak and Strauss, as well as more contemporary music such as the Fiddler on the Roof Medley. Those of you who were able to join us for the Orchestra’s concert on Seabrook Island in 2017 will appreciate what an exciting and entertaining program this will be!

The event is free and attendees are encouraged to bring their own lawn chairs or blankets. Please note that parking at the Lake House will be limited, so carpooling and alternate modes of transportation, such as walking, biking and LSV’s, are recommended.

In the event of rain, the performance will take place at the Holy Spirit Catholic Church, which is located at 3871 Betsy Kerrison Parkway on Johns Island.

Emergency Preparedness Tips
However, there is a significant difference between the Fed and the ECB that policymakers will need to watch carefully. The Fed has kept interest rates near zero and is likely to continue doing so for some time, while the ECB is considering raising interest rates to control inflation.

The yield curve is close to, but not quite, inverted as I write. What will be the impact of inflation expectations over the spectrum of maturities of fixed income assets? The yield curve is considered an inversion if the 10-year US Treasury yield is 25 basis points below the Fed Funds rate out to the 30-year US Treasury yield. The 10-year yield was 25 basis points below the Fed Funds rate on July 31.

The yield curve is an important function of the Fed’s rate decisions. A normal curve has higher yields on longer maturity bonds relative to shorter maturity bonds, whereas an inverted curve has lower yields on longer maturity bonds. The yield curve invertion can provide an early warning of a recession. It typically occurs before a recession begins, usually 12 to 18 months before a recession starts. When the yield curve is inverted, there is a heightened risk of a recession in the near future.

The yield curve inversion is an important indicator of economic conditions. A normal curve indicates that the economy is expected to grow at a steady pace, whereas an inverted curve indicates that the economy is expected to slow down and possibly enter a recession. The yield curve inversion can also provide information about the behavior of inflation expectations.

The yield curve inversion can also be an important tool for policymakers. If the yield curve is inverted, policymakers may be more likely to take actions to stimulate the economy, such as lowering interest rates. If the yield curve is normal, policymakers may be more likely to take actions to control inflation, such as raising interest rates.

The yield curve inversion can also be a useful tool for investors. If the yield curve is inverted, investors may be more likely to invest in long-term assets, such as stocks, rather than short-term assets, such as bonds. If the yield curve is normal, investors may be more likely to invest in short-term assets, such as bonds, rather than long-term assets, such as stocks.

The yield curve inversion can also be an important tool for central banks. If the yield curve is inverted, central banks may be more likely to lower interest rates to stimulate the economy. If the yield curve is normal, central banks may be more likely to raise interest rates to control inflation.

The yield curve inversion can also be an important tool for financial institutions. If the yield curve is inverted, financial institutions may be more likely to lend to businesses and consumers, as the spread between long-term and short-term interest rates is wider. If the yield curve is normal, financial institutions may be more likely to hold onto their assets, as the spread between long-term and short-term interest rates is narrower.

In the end, the yield curve inversion is an important indicator of economic conditions. Policymakers, investors, and financial institutions should be closely monitoring the yield curve to understand the implications for the economy and their own decisions.
Scano, where three years ago, built solar panels on his roof last December. Maurice Isaac, who researched the ins and outs of solar energy, is the man behind the panels. He commented that this change was necessary to his mom, and Socenecka agreed.

Socenecka Wyatt was the lucky recipient of a solar panel system in 2018. She has found that the panels provide 50% of her electric needs. He commented that the panels have provided a steady stream of energy, and now he can control his costs by managing his energy patterns along with your pro."},

Summary

THE WINE

I was going to relay the experience of a woman who is passionate about wine. I was going to describe the taste of each wine, the flavors, and the aromas. But when I sat down to write, I realized that words cannot capture the essence of wine. It is a sensory experience that transcends language.

The first wine I tasted was a Cabernet Sauvignon from California. The wine was dark red and had a rich aroma of dark fruits. The flavor was full-bodied and had a long finish.

The next wine I tasted was a Pinot Noir from Oregon. The wine was light and had a earthy aroma. The flavor was smooth and had a light finish.

The final wine I tasted was a Chardonnay from Australia. The wine was golden and had a floral aroma. The flavor was creamy and had a long finish.

In conclusion, wine is a complex and multifaceted experience. It is not just about the taste, but also about the aromas, the colors, and the textures. Wine is a way to connect with others and share a moment.

---

THE SEABROOK ISLAND FOUNDATION

I visited Seabrook Island, a small town in South Carolina. The town is known for its beaches and golf courses. I stayed in a beachfront hotel and explored the town by bike.

The town is small and has a relaxed atmosphere. The people are friendly and welcoming. I visited the Seabrook Island Golf Club, which is one of the best golf courses in the country.

I also went to the Seabrook Island Museum, which has a collection of artifacts from the town's history. The museum is located in a historic building and has a small gift shop.

Overall, Seabrook Island is a beautiful place to visit. The weather was warm and sunny, and the beaches were a great place to relax. I would definitely recommend visiting Seabrook Island if you are interested in a relaxing vacation.
TURTLE PATROL
NEST COUNT
HITS 90!

Seabrook Island Turtle Patrol members are simultaneously thrilled and exhausted as they manage and protect yet another record-breaking number of sea turtle nests in the year 2019. The 90 nests set a new mark for the island’s annual sea turtle nesting season. This year’s nests include 44.5 nests of loggerhead, which far exceeds the 55.8 average of the last 20 years. The combined effort has led to our most successful nesting season to date.

Unfortunately, the Seabrook Island Turtle Patrol is well prepared for the surge in activity. Over the past several years the Patrol has become more structured. The training programs for new members have become comprehensive and the addition of specialized nesting, pre-breakfast and inventory teams has resulted in a more organized approach and broader coverage. The turtle patrol has become more structured. The training program for new members has become more comprehensive, and the increase in training of activity.

The Turtle Patrol has also expanded its contributions to sea turtle conservation by developing broader public education and participation. Public education programs with educators from Seabrook Institute led to the development of the Turtle Patrol Blog on the internet and social media, as well as the creation of programs for children and special interest groups. The combined effort has led to our most successful nesting season.

BACKYARD BIRD WATCHING

Seabrook. Therefore, keep your binoculars on hand for birds you see. You may see hawks, owls, or other birds flying overhead. You may also see swallows or swifts swirling around your home. You may also see birds perching on branches or flying around your yard. You may also see birds perching on branches or flying around your yard.

Backyard bird watching is a year-round event on Seabrook Island, along with one other wild thing on Earth. It is a must-have for those who love birds and the natural world. It is wonderful to watch the birds, flowers, and other wildlife in your yard, and to feel connected to the natural world. It is wonderful to watch the birds, flowers, and other wildlife in your yard, and to feel connected to the natural world.

Birds are attracted to bird feeders, which provide them with a constant source of food. Some birds prefer seed feeders, while others prefer nectar feeders. Some birds are attracted to water, which provides them with a place to bathe and cool off on hot days.

CAMP SEABROOK
HEALTHY AGING
Jerry Reves, MD

How Many is Too Much?

This month we tackle a challenging question about aging. How many medicines are too many for any one person to take? The answer depends on exactly what medicine is necessary for the particular medical problem being treated. That is the easy answer, but the simple answer is not that simple.

Polypharmacy and Aging
As highlighted in a recent Washington Post feature publication by Beth Graham (July 31, 2019), there is a very large group of drugs that have anticholinergic effects that pose a particular problem to the elderly. Some of the names of these drugs are common. Drowsiness, dryness of mouth, constipation, reduced sweating, and incontinence are some of the anticholinergic effects. Anticholinergic effects can lead to memory loss, behavioral changes, and dementia. Doctors have been advised not to prescribe anticholinergic medications to patients and certain subsets of patients who may be more sensitive to these medications.

Polypharmacy is the use of multiple medicines, and sometimes the word is used to connote the use of over-the-counter medications and some of the anticholinergic effects. Anticholinergic effects are ubiquitous and used in the elderly and include loss of memory, behavioral changes, and dementia! Doctors have been advised not to prescribe anticholinergic medications to patients and certain subsets of patients who may be more sensitive to these medications.

Common Problems of Multiple Drugs in Older Patients

Anticholinergic Medications – A Special Risk

Dundees Island Real Estate has donated two Beach Wheelchairs!

Polypharmacy: Polypharmacy or multiple medicines (meaning they can be more or less effective) and some of the anticholinergic. Any increase in one person and the dose then needs to be lowered for the older patient. Common Problems of Multiple Drugs in Older Patients

Cancer Prevention Strategies for Women
Steve Perdikis, MD

Rebekah the United States health care system has received criticism for its gender gap. Women may be at a disadvantage in receiving the care they need. There are arguments for the treatment of women more aggressively than men. Despite less of these options, this may be a slight to be touched at the same level as the recently published American College of Obstetrics and Gynecology cancer prevention strategies for women. Many of these strategies may also apply to men. Cancer is the second leading cause of death worldwide and the third leading cause of death in the United States for women after heart disease and stroke. Cancer is a leading cause of death in women over 30.

ovary, uterine, leukemia, liver and bile a million are expected to die from cancer! It accounts for over 60% of the adult morbidity and mortality. Much more work needs to be done with the morbidity and mortality as well as the epidemic. In the US, an estimated 71% of women are attributed to alcohol, breast, colorectal, cervical, lung and skin cancers. Women should limit their alcohol intake to one drink a day.

Human papilloma virus (HPV) and cervical cancer. Regular screening for early cancers significantly reduces cancer mortality. HPV vaccination is recommended for girls aged 11-12 years.

Cervical cancer is the most common gynecologic malignancy in women. It is caused by the human papillomavirus (HPV). Cervical cancer is the second leading cause of cancer death in women. In the US, an estimated 20,700 new cases of cervical cancer were expected in 2013.

Cervical cancer is usually diagnosed in the first year of screening. It is caused by the human papillomavirus (HPV). Cervical cancer is the second leading cause of cancer death in women. In the US, an estimated 20,700 new cases of cervical cancer were expected in 2013.

From the Town of Seabrook Island: How to Request Mosquito Treatment

The Town of Seabrook Island is implementing a new mosquito treatment request tool on their website, giving residents the ability to request electronically. To access the treatment request tool, please visit their website at www.townofseabrookisland.org/mosquito-treatment and click on the “Services” menu, followed by the “Mosquito Control” button.

PRESIDENTS TRUST

Guy Gimson
Speaker of the House
South Carolina State House

Some bugs to be on the lookout for:

- Mosquitoes
- Bed bugs
- Spiders

While they are few, we encourage residents to take a moment to inspect their homes and yards for potential breeding areas.

IMPORTANT ACTION IF EVACUATION SEEMS LIKELY:

- Put outdoor & indoor screens on all windows.
- Put outdoor & indoor screens on all windows.
- Close shutters on all windows and doors.
- Close shutters on all windows and doors.

State governments can benefit greatly from an influx of new residents – with an increasing number of non-perishable food and water stockpiles, residents can be better prepared to weather the storm. Additionally, residents can help mitigate the spread of mosquitos by taking steps to prevent their breeding. Consider replacing landscape plants with native species that are resistant to mosquito bites.

EVACUATION:

- Contact security system provider re: ensuring fake alarms are not triggered.
- Turn off gas at the source to prevent leaks.
- Turn off gas at the source to prevent leaks.

- Contact contractors to make repairs. The Town of Seabrook Island can identify contractors licensed to work on Seabrook Island. Get written estimates. Keep all receipts for materials for insurance claims.
- Separate debris for pick-up – vegetation, wood from homes, chemicals, bottles & white trash, spoiled food.
- Uncover fire hydrants, and do not place trash near fire hydrants.

For more information on how to prepare for an evacuation, please visit www.townofseabrookisland.org. For written estimates, please contact us at (843) 884-6621. Keep all receipts for materials for insurance claims.

RETURN TO ISLAND

GARDEN CLUB OPENING GET TOGETHER SEPTEMBER 13

The Seabrook Island Garden Club will open the 20- 20 season on Friday, September 13 at the Old Coachman Cellarhouse. The meeting starts at 9 AM with breakfast to enjoy before a board business agenda. We look forward to seeing our membership, sharing our summer adventures and launching our program for the year Ahead! Not a member yet? Don’t let the past be the last! The Seabrook Island Garden Club is a great place to meet new people, to learn about our Delaware Area, to get involved and to support our community.

The memorable speakers bring a new perspective about the textures of information. There is a ton of information out there that no one wants to miss. Keeping the ideas flowing will be our Executive Director, Susan Wilson. She will discuss two items that are integral to the upcoming season. In one of these, we will learn about hydroponics farming and its future in our local area. The other will be a follow up to the flower show that was held earlier in the season. Our biggest goal is to have the Club, the flowers, and the members ready for the opening of the holiday season in early December. Serving the center core of the Seabrook Island Garden Club is a proud honor in helping our supporters in buying art, gift cards, and participating in our upcoming Christmas ball. The Garden Club is your current partner in the Delaware Area. It is our goal to bring art and culture into the Delaware Area.

We will be looking for new members for the 20-21 season. To join the Garden Club, please contact Mary Lou Wert (540-447-5021). To find out more about the Garden Club, please contact Susan Wilson at 540-447-7677.
