June is the official beginning of the Atlantic hurricane season. Activity is typically slow during this first month so now is a good time to start thinking about what you need to do to prepare for the 2022 hurricane season. Although the 2020 Atlantic hurricane season was extremely active with a record-breaking 30 named storms, Seabrook Island escaped relatively unscathed. On May 27, 2020, Tropical Storm Bertha made landfall, delousing us with rain. Then on August 5, 2020, the Category 1 Hurricane Isaias ran up the coast leaving us with little more than rain, big waves, and some minor flooding. Unfortunately, we were not so lucky in the four previous years (2016 to 2019) when the Town issued four evacuation orders for hurricanes Matthew, Irma, Florence, and Dorain. Colorado State University hurricane researchers are predicting an above-average Atlantic hurricane season in 2021. As always, there are predictions for the number of storms but for residents of Seabrook, it only takes one hurricane making land fall on or near our beautiful island to make it an active season for us!

Because it is impossible to cover all you need to know in one short article, I am going to provide you with some basic things to think about and then direct you to two local resources that will help you formulate your personal hurricane plan.

Review Important Documents
Make sure your insurance policies and personal documents are up to date. Keep insurance policy copies, insurance contact information, and Social Security numbers and identification cards together in one convenient place. Consider making digital copies and keep them in a secure pass-word-protected digital space. Prepare an “Evacuation Kit”. Because of the potential for extended travel times, it is wise to have an evacuation kit. It should include bottled water; non-perishable food (such as canned or dried foods); medications (prescription and supplements); personal hygiene items (toothpaste, toilet tissue, disposable (toilet) seat covers, first aid kit; one flashlight per person (preferably LED with crank charging); and disposable bags with closures for waste.

Plan Evacuation Route
The South Carolina Department of Transportation has established an evacuation route from Seabrook Island through Walterboro and on to Aiken, SC. However, if you evacuate early, you can choose your own route and avoid being subjected to the specific route designated by law enforcement.

To ease the volume of traffic leaving the Charleston area, the Governor may order reversal of westbound lanes of I-26 at the time evacuation is ordered. Be prepared for the possibility of encountering abnormally large volumes of traffic on local roads and interstate highways as storm impacts increase.

Another reason for a timely evacuation is the fact that our route includes the John F. Larimore Bridge (over the St. John River on Main Road) which can be declared unsafe for public travel when sustained winds reach forty miles per hour.

Identify Evacuation Destinations
As a hurricane develops, the location of landfall and the direction of approach may remain in doubt for several days so it is important to identify evacuation destinations in more than one direction away from Seabrook Island. Keep in mind that the incoming storm may also impact Florida and/or Georgia and will increase demand on inland locations in our state. This means that you should consider making reservations early in your hurricane preparations for accommodations at more than one location. Once expected landfall is established, reservations that are not being used can be cancelled. Be sure to know the cancellation policies at the time the reservations are made.

Anticipate Power Outages
You should include the potential for power outages in your planning for storm impacts. In the past, our community has experienced power outages from a few hours to several days due to hurricanes. Berkeley Electric may pre-emptively cut power to help reduce the time required for power restoration after the storm. Consider reducing the volume of perishable food in refrigerators and freezers in preparation for evacuation. (Food donations may be made to local charities.)

Tune in to Reliable Information Sources
For up-to-date weather conditions, you should monitor the local TV and radio stations. The National Weather Service at www.weather.gov has general weather forecasts customizable for any location, and the noaa.gov provides information specific to hurricanes. The Town will distribute information specific to Seabrook Island via the Town’s website (www.townofseabrookisland.org); the Town’s emergency bulk email system; the Town’s TWITTER feed (@seabrookisdndy); the Town’s FACEBOOK page (@townofseabrookisland); and the Town’s Toll Free telephone service (888-314-3177), the CoCoRahD telephone notification service; as well as Tidelines (www.tidelinesnh.com), and SIFOA’s Highlights. As a storm approaches, the Town will issue announcements of status changes together with recommended actions for residents. Once the storm has passed, the Town will issue announcements concerning conditions within the Town (including extent of damage and status of utilities) and, when appropriate, informing residents when they will be permitted to return.

Check Out Local Resources
The Town’s website (www.townofseabrookisland.org) has several pages dedicated to emergency preparedness. Links to this information (which include emergency resources and sign up for CoCoRahD), can be found at the bottom of the home page. We also provide printed materials, available in the lobby at Town Hall, about preparation, evacuation routes, and supplies to have on hand.

Exchange Club of Kiawah-Seabrook Foundation presents the Angel Oak Award to Mrs. Mary Hill

Mrs. Mary Hill received the Exchange Club of Kiawah-Seabrook Foundation’s Angel Oak award Wednesday evening at a sold out event held at Wingate Place on Johns Island.

Mrs. Hill has dedicated her life to helping others in the community. In her acceptance speech, Mrs. Hill pointed out the challenges facing the citizens of Johns and Wadmalaw Islands, and the devastating hit they took due to the pandemic. In March 2020, unemployment in Charleston was just 2.3 percent and within two months, unemployment was six times that, to 12.2 percent. The people most affected were those who could least afford it, the working people of Johns and Wadmalaw Islands. Mrs. Hill’s leadership at the Sea Island Hunger Awareness Project pivoted to help to make sure that people in the community had enough to eat through the pandemic. She said that the orga-nizations under the Project’s leadership focused on three key issues related to hunger: availability – the ability to get healthy food at a reasonable cost, accessibility – the lack of grocery stores in many areas most affected by the pandemic, and availability – limited options to get healthy food. In addition to the Hunger Awareness Project, Mrs. Hill has been leader for Habitat for Hu-manity and the Water Wellness Project for Johns and Wadmalaw Islands.

Mary Hill’s leadership is recognized by the community as crucial to our well-being. Mrs. Hill reminds us that we’re all part of a larger community and it’s our obligation to help those in need in that community. For her efforts, the Exchange Club of Kiawah-Seabrook gave Mrs. Hill a $5,000 grant to contribute to the organization of her choice. Mrs. Hill has asked that the 5,000 be donated to the Sea Island Hunger Awareness Foundation.

Michael Morris, Editor

Edisto

Burial at St. Christopher

St. Christopher Church and Cemetery on Edisto Island is the final resting place of three of the authors. St. Christopher’s burial ground is located on the Antioch Peninsula near Edisto Island, South Carolina. It offers a safe and nurturing environment for individuals of all ages to explore their faith, develop personal and spiritual growth, and have fun while making connections with others.

The burial ground at St. Christopher is well-marked and contains four bodies buried in separate graves. The site is open to the public and free of charge. Visitors are encouraged to respect the peaceful atmosphere of this special place.

The burial ground at St. Christopher is a beautiful and tranquil place to visit. The grounds are well-maintained, and visitors are welcome to spend time here reflecting on their faith and spirituality.

The Seabrooker

Area

Recent burials include a pet memorial for a beloved Seabrooker, as well as a memorial for a beloved pet from a neighboring community. The Seabrooker is interested in hearing from our readers about any recent burials or pet memorials that have taken place in our community.

Seabrooker Review of Oyster and Water Quality Report

Seabrook Island

Seabrook Island is located in area 15, at an area of 8,254 acres, bounded by Johns Island to the east, Edisto River to the south, the Ashley River to the west, and Beaufort Road to the north. Primarily affected bodies of water are John's Creek, South Carolina, Goose Creek, South Carolina, and New Cut Creek, South Carolina, who provide parts of the water quality which could change the area conditions.

Seabrook Racquet Sports Hosts Olympic Event

For the first time Seabrook Island Racquet Sports hosted World Team Tennis and Pickleball to coincide with the Tokyo Olympics. The social event had 30 men and 30 women players competing in 10 tournaments, Brazil, Colombia, Greece, Italy, Japan and Australia. The round robin format where each country’s players competed their winning games counted in a gold medal for Brazil, silver for Australia and a bronze for Italy. Club Executive, General Manager of Seabrook Island Club, secured food trucks on the property to enjoy authentic food from one of the Pro Shop. But Bills Farm Market offered pulled pork tacos with cabbage and Miracles of local mustard dressed in spicy, garlic and brown. The competition was managed by Laura Ferreira, Director of Racquet Sports, who promised a similar event next year to coincide with the FIFA World Cup.

I have been studying the details surrounding and reviewing the world of Cryptocurrency for a while. This vast uncharted territory that was once a small niche of the financial world has turned into a major player in the global economy. The history of Bitcoin (or any Cryptocurrency) as we know it now extends back to 2008. The paper’s first line sets the stage in October 2008 with a white paper written by an unknown individual under the pen name of Satoshi Nakamoto. This document introduced the world to the concept of a decentralized digital currency that would operate on a peer-to-peer network. The idea of mining and the blockchain technology that underpins all Cryptocurrency as “a digital or virtual currency” that is secured by cryptography which makes it nearly impossible to counterfeit or steal alone. Many cryptocurrencies are decentralized networks based on blockchain technology.

At the heart of cryptocurrency is the concept of a digital ledger that is accessible for all to see. A new block is set to be made every 10 minutes. The block contains a block header which includes a timestamp and a transaction list. The block header is then self-verified, which makes it nearly impossible to alter the entire blockchain. If a transaction is added to the blockchain, it becomes irreversible and resistant to any form of manipulation. However, governments can still trace the transactions to the people involved in the network and thus maintain some level of oversight into the transactions taking place. The ledger is public, and a new block is added to the blockchain every 10 minutes.

Bittorrent is the group called “Bitcoin miners.” These individuals and organizations all around the world mine for Bitcoin and the key to the Bitcoin protocol is the ability of users to become miners by setting up mining entities and purchasing equipment. These steps involve both a cryptocurrency algorithm (mathematical) puzzle. The puzzle is solved, and blocks of transactions are added to the blockchain, which is used to increase the number of bitcoins that can be mined. As a result of this, the Bitcoin protocol is self-verified, which makes it nearly impossible to alter the entire blockchain. If a transaction is added to the blockchain, it becomes irreversible and resistant to any form of manipulation. However, governments can still trace the transactions to the people involved in the network and thus maintain some level of oversight into the transactions taking place.

The Bitcoin (BTC) story began in October 2008 with a white paper written by an anonymous individual or group called Satoshi Nakamoto, who has since remained out of the public eye. This unknown person, presumably to remain anonymous, was the creator of Bitcoin. The core elements of the Bitcoin protocol are the creation of a single distributed digital ledger that operates on a peer-to-peer network. This ledger is secured by cryptography which makes it nearly impossible to alter the entire blockchain. If a transaction is added to the blockchain, it becomes irreversible and resistant to any form of manipulation. However, governments can still trace the transactions to the people involved in the network and thus maintain some level of oversight into the transactions taking place.

Expensive and highly collectable wines such as the French Bordeaux wine from Expensive and highly collectable wines such as the French Bordeaux wine from Michael Morris - Vintage Wine

I received a tip from the other that another column would be covering cryptocurrency in this month’s issue. I figured it would be a good opportunity to glance back at the history of cryptocurrency. Bitcoin is the first decentralized digital currency, and it has since evolved into a technology that is being used in a wide range of industries, including the wine industry. What can blockchain do for wine? The technology has the ability to solve some of the main issues within the wine trade. The blockchain tech allows for the tracking and authentication of products, which is crucial in the wine industry because of the potential for counterfeit and illegal trade. The blockchain technology also allows for the creation of smart contracts, which can be used to automatically execute certain actions when certain conditions are met. This can be useful in the wine industry for things such as the tracking of vintage wines or the issuance of digital certificates for wine bottles. The blockchain technology is also being used in the wine industry for the creation of digital souvenirs, which can be used to create unique experiences for customers. The blockchain technology can be used to create digital tokens that represent ownership of a wine bottle or a wine vintage. These tokens can be transferred on a peer-to-peer network and can be used to create unique experiences for customers. The blockchain technology can be used to create digital tokens that represent ownership of a wine bottle or a wine vintage. These tokens can be transferred on a peer-to-peer network and can be used to create unique experiences for customers.

New Airline Breeze to Launch May 27 with Service to 16 Cities, Including 11 from Charleston

Warren Wire/P&Co

Newly minted airline Breeze Airways will take off June 27 as an inaugural flight at Myrtle Beach Sunport and begin service to other cities, including 11 from the Lowcountry over the next two months.

Launching the new airline

State and local officials have been expecting the new low-cost carrier to launch for years.

“Breeze is a hedge to fill the void left by the demise of Spirit Airlines earlier this year,” said Misty Wilson, Executive Director of Aviation for the Charleston Area Metropolitan Airport Authority (CAMAA). “The opportunities are endless for what Breeze can do in the future for aviation in the Lowcountry.”

Breeze Airways, the new ultra-low-cost airline, will begin service on June 27 with a flight from Providence, R.I. to Myrtle Beach. The company is joining the Lowcountry aviation market as a new entrant and will operate two flights per week between Providence and Myrtle Beach.

Breeze Airways is a subsidiary of JetBlue Airways, which is the parent company of JetBlue Airways. The company operates a fleet of Boeing 737-800 aircraft, which are equipped with 129 seats in a single-class configuration. The aircraft are equipped with JetBlue’s signature “Go Light” cabin, which features a variety of amenities, including a high-speed internet service, an in-flight entertainment system, and a complimentary Wi-Fi service.

Breeze Airways is the latest addition to the Lowcountry aviation market, which includes the Charleston International Airport and the Charleston Metropolitan Airport. The company is expected to bring new destinations to the Lowcountry, which will be announced in the coming weeks.

TOWN OF SEABROOK ISLAND
April 27, 2021, at 2:00 p.m.

Minutes

The April 27, 2021 Town Council meeting was called to order at 2:05 p.m. by Mayor John Gregg. The meeting was held at the Town of Seabrook Island Office located at 2420 Cat Tail Pond Road – Seabrook Island, South Carolina. Mayor Gregg called for the reading of the minutes from the March 23, 2021 meeting. The minutes were approved as presented.

Treasurer’s Report

The Treasurer’s Report was presented and approved.

Secretary’s Report

The Secretary’s Report was presented and approved.

The Town Administrator reported on comments received by the public regarding the Emergency Operations Ordinance. The Council was reminded that the emergency ordinance on March 23, 2021 must be reconsidered to bring it into compliance with state law. Before voting, Mayor Gregg reported that the DRC and Ordinance 2021-05 simply made permanent in the draft version of the Development Standards Ordinance. Ordinance 2021-04: An ordinance providing for the adoption of the Development Standards Ordinance would be adopted. The consideration for Ordinance 2021-04: An ordinance providing for the adoption of the Development Standards Ordinance was presented and approved.

Ordinance for First Reading

Ordinance for the Town of Seabrook Island Home to First Loggeederhead Sea Turtle Nest of the Year in South Carolina

Seabrook Island is the first stop harboring the first loggerhead sea turtle nest of the year in South Carolina. On Monday, May 17, 2021, a twenty-five-year-old female loggerhead turtle named Shelly, identified at the nest on May 9th, 2020, laid her nest at Seabrook Island Beach Club pools. Mayor Gregg tendered his applause for the great work done by the Seabrook Island Turtle Patrol.

The next month the official start date for breeding season is May 9th, 2021. The Seabrook Island Turtle Patrol has been home to the first nest of the year in the state, with the previous time being 2014. Mayor Gregg confirmed that the Town of Seabrook Island has an ongoing program to monitor nests and protect sea turtles.

The Seabrook Island Turtle Patrol, in cooperation with the South Carolina Aquarium, is dedicated to the conservation and protection of sea turtles. The patrol provides public education and outreach, conducts research, and monitors nesting sites in the area. The Seabrook Island Turtle Patrol is the only patrols in the area that monitors nests and protects sea turtles.

Congratulations
Phil!

Phil Mickelson gave the fans a victory, a thumbs up, and an unforgettable 72nd hole of the PGA Championship

The Wyatt family on Wadmalaw Island

Water Wellness Mission was created in February 2014, as an outreach of the Sea Islands Hunger Awareness Foundation. This much-needed organization helps those in need reside on Johns Island and Wadmalaw Island that do not have access to clean, healthy water. Some have no water at all; it's within safe that in the 21st century this condition exist.

Water Wellness Mission celebrated it's 20th year establishment in January 2021. These families are now able to enjoy what most others take for granted. And they no longer have to beg for their water in jugs. We have a total of 2830 jugs completed to date with all applicants on the waiting list. Please consider helping our neighbors gain clean water.

Stroll Through The Centuries Along Charleston's Secret Alleyways & Lanes

More glimpses through the layered history of the city as well as the lives and livelihoods of merchants and tradesmen, mariners and artisans, immigrants and enslaved people.

PHRENO'S ALLEY

It may be hard to imagine, but this short, rather elegant residential lane between King and Meeting streets below Treadway was once swampy woodland. One of the oldest hand-dug streets in the city's history, it originally marked the boundaries of Vanderhorst Creek, today's aptly named Water Street. Phrenos known as "Phrenos Lane" for landowner Phreny Simons, who owned an adjacent plantation. His name was similar to the word "phrenology" and his son, also named PHRENO, bought the property in 1824. According to speculators it was the "good and noble land" encompassing the the land. Price owned a tavern here, one of the many taverns of the alley over time. Beyond the road Nothing stood on the site of the present-day hotel. A grand house built was the first of the old houses to be transformed to a hotel. It was the home to both immigrants and African American tradesmen. In 1766, brother Leonard Fifeall, a true son of color, bought land here and built a home for his family. The property remained in the hands of Fifeall's descendants for more than a century.

ROPEMAKER'S LANE

Begun in the French Quarter, this now-

Avenue of the Oaks & Botany Bay Road. The Avenue of the Oaks, pictured above, winds through the historic

Botany Bay Road (shown above left) is located on Edisto Island and runs along Botany Bay Plantation. The plantation's earliest origins date back to the late 1600s but it did not become Botany Bay Plantation until the 1830s. The best part: you can take a tour down this road surrounded by lush greenery for free. And, last but not least, we are Seabrokers ready to meet our beloved drive on Botany Road above right!

UNITY ALLEY

This enchanting walkway winds through the churchyard of the oldest Unitarian Church (circa 1772) in the South, and the second oldest sanctuary in Charleston. This section of the longer Gateway Walk, designed by landscape architect Lauren Briggs and the Garden Club of Charleston in 2010, eschews Archdale Street through the gardens created and them to Patriots Alley. The tree-lined path, created in 1772, was originally known as "Simmons Alley," named for John Simmons, one of the first known as "Simmons Alley," named for John Simmons, one of the original New England Congregationalists who settled the town. McCrady's Tavern and Long Room, where President George Washington was lavishly entertained in the late 1770s, including African American cabinetmaker John Gough. At No. 2 was Edward McCrady, whose original tavern was around the corner on East Bay, began purchasing surrounding property in 1791 at a banquet hosted by the Charleston branch of the Society of the Cincinnati. McCrady, a successful merchant and shipbuilder, began purchasing additional land, including the Long Room. After McCrady's death in 1801, it became Eude's Tavern, then the Long Room catered to upper-class Charlestonians who also enjoyed plays and musicals presented at the Long Room. By 1827, the property was surrounded by the city's largest hospital, St. Michael's Hospital, which closed in 1830. In 1892, the building served as a private club, and in 1935, it was added to the National Register of Historic Places. In the 1960s, it was converted into McCrady's Restaurant, which closed in 2003, a historic tavern felled by a modern pandemic.

UNITY ALLEY

Once upon a time, the brick and iron blacked passage between East Bay and Meeting streets was woven with history. The area was home to many tradesmen, artisans and market men. East Bay was the site of the original New England Congregationalists who settled the town. This section of the longer Gateway Walk, designed by landscape architect Lauren Briggs and the Garden Club of Charleston in 2010, eschews Archdale Street through the gardens created and them to Patriots Alley. The tree-lined path, created in 1772, was originally known as "Simmons Alley," named for John Simmons, one of the original New England Congregationalists who settled the town. McCrady's Tavern and Long Room, where President George Washington was lavishly entertained in the late 1770s, including African American cabinetmaker John Gough. At No. 2 was Edward McCrady, whose original tavern was around the corner on East Bay, began purchasing surrounding property in 1791 at a banquet hosted by the Charleston branch of the Society of the Cincinnati. McCrady, a successful merchant and shipbuilder, began purchasing additional land, including the Long Room. After McCrady's death in 1801, it became Eude's Tavern, then the Long Room catered to upper-class Charlestonians who also enjoyed plays and musicals presented at the Long Room. By 1827, the property was surrounded by the city's largest hospital, St. Michael's Hospital, which closed in 1830. In 1892, the building served as a private club, and in 1935, it was added to the National Register of Historic Places. In the 1960s, it was converted into McCrady's Restaurant, which closed in 2003, a historic tavern felled by a modern pandemic.

Rope Lane," as this quaint alleyway near St. Michael's Church was originally known, is entwined with a history true to its name. It may be hard to imagine, but this short, rather elegant residential lane between King and Meeting streets just below Tradd Street is one of the city's oldest thoroughfares. It was used for warehousing, and by the 1980s, many of the buildings were converted to use as offices. In the 21st century, the lane is once again a residential street.

In the heart of the French Quarter, this one-block lane between East Bay and State streets is one of the city's oldest thoroughfares. It was known as "Sommers Lane" for landowner Humphrey Sommers, one of the original New England Congregationalists who settled the town. McCrady's Tavern and Long Room, where President George Washington was lavishly entertained in the late 1770s, including African American cabinetmaker John Gough. At No. 2 was Edward McCrady, whose original tavern was around the corner on East Bay, began purchasing surrounding property in 1791 at a banquet hosted by the Charleston branch of the Society of the Cincinnati. McCrady, a successful merchant and shipbuilder, began purchasing additional land, including the Long Room. Deveaux Bank – Seabrook’s Wonderous Neighbor!

Spring, the sound of bird song is in the air and the signs of nesting and mating for our seabird species. The Oystercatchers have been back at Seabrook since mid-February, working on their nesting spots. We see them along the beach, perched on the rocks, perched in the trees – their presence is an exciting time of year to observe these birds. Deveaux Bank Sanctuary provides a protective barrier. Among the birds nesting in the sanctuary are, Barred Owl, Red-tailed Hawk, Osprey, Great Egret, Wood Stork, and even a few Osprey. Seabrook Natives have taken note of the numbers of nesting seabirds because of its isolated nature and lack of mammalian competitors of nesting seabirds because of its unique system; it completely subsided in 1980 and is 215 acres. The size of this sanctuary is so small that all the nesting birds are visible from one spot. We have yet to find a nesting of shorebirds on Seabrook, but we know there are several species that use the island, crucially being watched by nature.

Another possible nesting, although the picture is not clear is on our home in Atlantic, the Bananaquit. Look along fencerows for Tamiasciurus hispidus or you can spot species with fluffy tails. We’ve been looking for more wildlife and they are more significant, and status rising in many states in 2020. We have not yet found a nesting of shorebirds on Seabrook, but we know there are several species that use the island, crucially being watched by nature.

The Flyway:
The story of the US population rise of 1990 is only partly due to the National Avalanche Park. The Flyway is a global phenomenon that involves the migration of birds across North America. The Flyway is an important aspect of the natural world, and it is used to track the movement of birds. The Flyway is divided into several distinct regions, each with its own characteristics. The Flyway is a complex system, and it is not fully understood. It is believed that the Flyway is influenced by a variety of factors, including weather, vegetation, and human activity. The Flyway is an important aspect of the natural world, and it is used to track the movement of birds. The Flyway is a complex system, and it is not fully understood. It is believed that the Flyway is influenced by a variety of factors, including weather, vegetation, and human activity. The Flyway is an important aspect of the natural world, and it is used to track the movement of birds.

Deveaux Bank – Seabrook’s Wonderous Neighbor!

From almost anywhere on Seabrook Island, you look out towards the ocean and see this body of land, or wait, is it a sandbar? It is actually Deveaux Bank – Seabrook’s Wonderous Neighbor! The Deveaux Bank Seabird Sanctuary was established to protect significant nesting habitat of sea birds. Deveaux Bank Sanctuary encompasses approximately 215 acres. The size of this sanctuary, and it may sometimes disappear over the years. It was established as a sanctuary in 1972. It was temporarily abandoned in 1980, when it was covered by a sandbar? It is actually Deveaux Bank – Seabrook’s Wonderous Neighbor!

We think of the Back Roads using Hardeeville and Seabrook Island during the day and Deveaux Bank Sanctuary during the night. Seabrook Island may have the layout of the keys on the Atlantic coast for the years, perhaps 1000 birds come in on the tide line.

The colonial beltline of beaches is rarely as visible to the casual visitor. Beaches are densely packed with bird life during the nesting season, rendering the area more difficult to navigate by car or on foot. The Deveaux Bank sanctuary is an essential nesting area for the Atlantic coast for the years, perhaps 1000 birds come in on the tide line. Of the total number of birds observed during the nesting season, the colonies are not easily visible due to the dense forest cover and the difficulty of observing from a distance. The Deveaux Bank sanctuary is an essential nesting area for the Atlantic coast for the years, perhaps 1000 birds come in on the tide line.

US Marines To Celebrate 246th Anniversary

The traditional Marine Corps Birthday Celebration is returning to the Seabrook Island Community Center in Seabrook Island, South Carolina, on Thursday, November 11th, at 6:30 p.m. It will be announced today by Jim Bianatarze and Justin Follmer. Co-Chairs for this annual event, which has existed for 100 years, and importance of maintaining a tradition. The Celebration will include a cooked hot dog dinner, history, and a brief talk. The event is part of Marine Corps history since November 10, 1921. Persons interested in attending and/sponsoring the event are encouraged to contact Jim Bannister at jim@www.SeabrookIslandVillage.org or by email at SIVillageMail@gmail.com.

HELP WANTED

We at Seabrook Island Village are in need of volunteers. When the pandemic hit, people were more naturally cautious about mingling with strangers, so we lost some volunteers to the reality. Now that the pandemic is slowing and roads reopening has been lifted in most locations, we are hoping we can win more of our neighbors back to help out. You can contact us at 843-580-2088, or at our website, www.SeabrookIslandVillage.org, or by email at SIVillageMail@gmail.com. Seabrook Island Neighbors can help our cause, as we hope you will join us while we carry out our promises to our neighbors.

A Special Outdoor Event

Sunday, June 6, 2021
James Island County Park - Wappoo Shelter
871 Riverview Dr, Charleston, SC 29412

Join us for the launch of Charleston Music's South Charleston Music Initiative with a special outdoor performance by the Charleston Symphony. Bring your own chairs or reserves a picnic table – and be sure to pack a picnic if you'd like. We will provide the dessert!

Music of the Movies: Heroes and Villains (10/2)
The Great American Songbook (1/20)
Chopin’s Masterpiece (2/4 & 2/5)
Hart of Tchaikovsky (1/7 & 1/8)
Stars of the CSO (11/19 & 11/20)
Stravinsky’s Petrushka (3/4 & 3/5)

HOLIDAY PERFORMANCES

Holiday Pops! (12/22 & 12/23)

BLOOD DRIVE

Next Seabrook Community Blood Drive
Friday, June 4, 2021

Built items can be left curbside by 7:00 a.m. Please include clothing, furniture, electronics, garage, lawn, kitchen, or other similar household items when you would normally leave your trash and recycling. Household wastes such as old paint cans, batteries, medical sharps, and old yard or household chemicals can be taken to the Maintenance area (in the Community Garden) that morning between 8:00 a.m. and 12:00 p.m. Household materials must be handled securely to the attendant to duty. The materials cannot be left on the ground.

Seabrook Island Village
